Adam Song

Senior Full Stack Engineer

as.asuperstar05@gmail.com • www.linkedin.com/in/adam-song05 • Wroclaw, Poland

SUMMARY

Adam is a senior-level full-stack engineer with a demonstrated history of working in various industries, including eCommerce, eLearning, insurance, finance, telecommunications, healthcare, and many others. His experience with full-lifecycle work across multiple fields makes him a valuable asset to any team. He also gained valuable experience working with startups, launching new projects from scratch. He is also a fast learner with a passion for technology and innovation.

Experience

Brainhub

Senior Software Engineer **03/2022 – 06/2024**

- Led the development and implementation of scalable websites with JavaScript frameworks including React, Next.js, and Vue.js.
- Designed and developed high-performing backend systems with Node.js, Express.js, PHP/Laravel, Python/Django, and Java/Spring Boot.
- Integrated smart contracts with front-end interfaces using Web3 libraries like web3.js and ethers.js.
- Participated in developing Android 12 OS and customized core system apps (Launcher, Settings, System UI) and other apps using Java and Kotlin.
- Extensively used AWS Cloud technologies like Lambda, API Gateway, Cognito, EC2, S3, SNS, RDS, CloudWatch etc.

Ceneo

Full Stack Engineer **06/2021 - 02/2022**

- Responsible for development of fintech, e-commerce websites using Python and Django for backend and React for frontend.
- Integrated third party APIs for the payment gateway setup like PayPal and Stripe, and established email and text messaging services using Sendgrid, Twilio and AWS SES.
- Maintained communication and relationships with stakeholders and clients to ensure estimates and projects were delivered on time.

Wezom

Full Stack Engineer **03/2019 - 05/2021**

- Developed a dynamic and responsive website for Skyesports, a prominent platform in the gaming and esports industry, using React, Node.js, and Express.js.
- Designed the database structure using PostgreSQL and implemented Restful APIs and GraphQL.
- Established CI/CD pipeline using GitHub Actions and Jenkins for testing and automating development process.
- Worked with the business owner and customers to maintain scale and develop new features and functions across platforms.

Wezom

Front End Developer **07/2017 - 03/2019**

- Started as a Front-end developer and mastered React, Redux, and TailwindCSS.
- Gained experience with PHP Frameworks, including WordPress, Laravel, and Symfony.
- Collaborated closely with senior developers to troubleshoot bugs, perform code reviews and implement performance enhancements.
